SJ 410 Series

With the ability to collect data straight to your pc using our U-WAVE Wireless Software and various accessories for further applications, Mitutoyo's SurfTest SJ 410 Series gives you a higher quality control level while maintaining a user-friendly measurement experience.

The 410 Series also gives you extra measurement capability, by using the same roughness measurement data to perform simple contour measuring functions (fine contour).

To learn more regarding the SJ 410 range of portable surface roughness testers, and the specific model SJ-411 currently on sale, click below.

PJ Series

PJ-PLUS PROFILE PROJECTORS

Mitutoyo introduced the PJ-Plus into its PJ Profile Projector Series lineup. Like other PJ Series Profile Projectors, This model is available with a wide choice of measuring ranges.

The PJ- Plus gives you high durability and energy saving. The new heat sink system reduces the need for a cooling fan, which drastically reduces oil and dust adhesion to the internal mirror, lens, and light source. The newly developed LED light source improves lighting while also reducing the cost of operation. To learn more about the new model and other Profile Projectors, click the View Product Information button.
