Litematic

Mitutoyo's VL-50-B Litematic is a high-resolution digimatic measuring unit. The Litematic is ideal for measuring the thickness or height of a workpiece that can be easily affected by the measuring force.

The Litematic has a high resolution down to 0.01 μm and a wide 50mm measurement range. The use of a low thermal-expansion material for the spindle and ceramic for the measuring table minimizes the effect of temperature variation during use.

To learn more about all capabilities and quality experience of the Litematic click below to view more product info.
