Great Summer Specials on High Density Flap Discs

The best choice for smooth finishing. Type 27 flap discs are used at flatter angles (0 to 15 degrees) and are used primarily on flat surfaces. High Density flap discs provide 50% more usable abrasive than standard flap discs. The added abrasive gives a cushion to the product which provides a quick grind with less heat to produce a higher quality finish.

Model No.	Size	Grit	Max RPM	Qty/Box	Code	Price \$ per ea.
